

Nursing Care

Clinical support for complex or long-term health needs, from carers trained to manage them properly without leaving home.

IS NURSING CARE RIGHT FOR YOU?

- Ongoing health conditions need regular clinical monitoring
- Wound care, catheter care, or other clinical procedures are required
- A recent hospital stay means extra support is needed during recovery
- Medication is complex and needs a trained hand, not just a reminder

WHAT'S INCLUDED

- Clinical health monitoring
- Wound care and management
- Complex medication administration
- Coordination with GPs and district nurses
- Support following hospital discharge

Senior Health Care
